**Potential competing interests:** No potential competing interests to declare.

The article "Incidence risk of major reproductive disorders of dairy cows and cow-level risk factors in Wolaita Sodo town, southern Ethiopia" presented the study on incidence risk of major reproductive disorders of dairy cows and cow level risk factors in a simple and systematic way. It identify the various risk factors, discussed the problems and probable reasons for it. Also the discussion part in relation with the findings of other workers were well presented.

I understood that this is a sub component of the larger project but I would love to see a bit more of constructive suggestions added to the mitigation of risks factors along with the responsibilities of various stakeholders.
