Review of: "Do Androids Dread an Electric Sting?"

Asad Butt

**Potential competing interests:** No potential competing interests to declare.

This was a review article that explained about more of a future expectations. It was interesting read and authors presented good arguments. Th references could have been improved. Examples were given of conscience AI but they seemed more unrealistic. Human Vs. AI. AI cannot take over humans. This is a debate that perhaps that will never end. Try not to use I in writing a research paper or review article. Article is well-written. The structural flow of sentence is also good. Layout is nice as well. I accept the review.
