The research entitled "Study of Environment-Behavior in Three Types of Urban Contexts in Tehran: A Comparative Analysis of the Chizar, Narmak, and Khazane Neighborhoods Using Survey and Spatial Syntax Methods" represents a commendable effort, characterized by extensive fieldwork and a wealth of gathered information. However, it is pertinent to address certain aspects to enhance its overall quality.

While the work contains substantial information, the objective delineation appears somewhat ambiguous, requiring further clarification. Additionally, the methodology section lacks necessary detail, rendering the comprehension of results challenging. On a positive note, the discussions and conclusions presented are of exceptional quality, reflecting the authors' insightful analysis.

By addressing the identified deficiencies in the aforementioned sections, the overall quality of the research can be significantly improved. Enclosed within this document are my contributions and suggestions aimed at enhancing the clarity and depth of your study.

I wish to take this opportunity to extend my heartfelt congratulations to the authors for their achievements thus far. I am confident that the proposed improvements will contribute positively to the scholarly value of your work. Please accept my warm regards, and I trust that my input proves beneficial to your research endeavors.
