

# Review of: "Microsurgical Repair of Severed Thoracic Spinal Cord and Clinical Outcome: Technical Case Report"

Michael Ode

**Potential competing interests:** The author(s) declared that no potential competing interests exist.

A good write up detailing the surgical treatment of a traumatic SCi that resulted in a Brown Sequard Syndrome. However a few observations noted.

1. Images are not clear and all images need to be labelled for better clarity
2. The surgical details were stated in some detail , but not much detail was given to the rehabilitation regimen. inclusion of this would be helpful.
3. The discussion section has some grammar that would need to be corrected
4. Some more detail of neuroplasticity would enrich the manuscript.
