Salivary Gland Clear Cell Carcinoma, Not Otherwise Specified

National Cancer Institute

Source

National Cancer Institute. *Salivary Gland Clear Cell Carcinoma, Not Otherwise Specified*.
NCI Thesaurus. Code C62191.

A carcinoma that arises from the salivary glands, most often the minor salivary glands. It is characterized by the presence of a monomorphic population of malignant epithelial cells with clear cytoplasm and the absence of morphologic features that define other primary neoplasms of the salivary glands.
