Potential competing interests: No potential competing interests to declare.

It is a fascinating study. Congratulations.

The abstract does not describe the acronym MNC's.

In the abstract, specify what kind of literature review and the period of time.

The abstract does not include the results section.

The introduction section does not include background on the objective of the study, like social capital, public life or active nightlife.

The methodology section does not specify the literature review's inclusion criteria, like period of time.

In 4.1.2, I suggest describing the sociodemographic characteristics of 20 persons.

In the conclusion section, suggest to describe limitations during the study.
