# BRD4-Interacting Chromatin-Remodeling Complex-Associated Protein-Like

National Cancer Institute

## Source

National Cancer Institute. *BRD4-Interacting Chromatin-Remodeling Complex-Associated Protein-Like*. NCI Thesaurus. Code C157088.

BRD4-interacting chromatin-remodeling complex-associated protein-like (1079 aa, ~115 kDa) is encoded by the human BICRAL gene. This protein is involved in SWI/SNF-mediated chromatin remodeling.
