**Potential competing interests:** No potential competing interests to declare.

I would like to congratulate the author for adding to the body of knowledge. This information is very important not only in South Africa, but the surrounding region as well. It is for this reason that I suggest that it would have been beneficial to include what other countries in the region have done in line with your topic. I would also suggest that the author should avoid using first person tenses in professional writing. Otherwise, this is a well written paper and congratulations.
