

Review of: "IoT Noise And Air Quality Observation System"

Vanniappan Malathy Malathy

Potential competing interests: No potential competing interests to declare.

Title of the article is incorrect. What is IoT noise? Formation of sentences must be focused on. Avoid using first person and third person in the article. This article tells about the simulation as well as the physical components. Should work with the hardware, and output screenshots shall be explained. No previous work is explained in the introduction part. In the references, why are the links given? References should be in the prescribed format, and they should be cited in the content. Latest papers should be referred.
