

Review of: "Motivational Variables as Predictors of Academic Achievement Among University Students"

Ami Febriza¹

¹ Universitas Muhammadiyah Makassar

Potential competing interests: No potential competing interests to declare.

Methods: The study utilized a non-random sample of 117 students, evenly divided by gender, with ages ranging from 18 to 24 years old, primarily. The sample comprised students from various academic areas: 28% from the business area, 19% from a first group in Engineering, 24% from a second group in Engineering, and 29% from the Health area. The author was also the teacher responsible for the course from which the sample was drawn. The author should provide the eligible criteria for the respondents. It also needs an explanation about how the study size was arrived at.
