Reviewer Comments

1. Introduction is too long, and it's deviating from the title. Authors had elaborate more on financial aspect.
2. What is the cancer burden in Nigeria and Romania
3. Methodology is not written in flow. Better to follow STROBE checklist.
4. Study setting is it significant to mention in depth in the article?
5. Statistical analysis is not appropriate.
6. Statistical analysis by ANOVA. How ANOVA is indicated when only proportions were compared?
7. The demographic details like age, gender and socio-economic status and type of cancer had increase the weight-age of the article.
8. How the satisfaction of patients was measured?
9. Authors had compared their results only with one study conducted by Basu et al. This study was conducted at different study setup.
10. What are the limitations of this study?
