Potential competing interests: No potential competing interests to declare.

First of all, I am happy for the second invitation to review the manuscript for this journal. I cannot recommend that it is acceptable for publication in this journal. The manuscript need major revisions. The authors did not change the manuscript based on the first comment raised by his reviewers. The comments are appended below

Title should be accurate.

Choose appropriate keywords.

The English languages are very bad

Abstract still needs modification and re-writing.

At the end of the introduction there should be motivation or justification of your title and re-write the introduction part.

Conclusions and discussions also needs elaboration and skill.

Finally, The authors must incorporate my 1st and 2nd comments in the revised manuscript then I can change my decision.
