Potential competing interests: Major Revision

Dear authors,

I read your paper titled "The antithetical relationship of Entrepreneurship and Corruption on Radicalization among the Moroccan Youths: an empirical study", and found it interesting and promising. However, at this stage, there are some issues that led me to suggest numerous improvements. I hope you find the comments useful to, improve the paper. Below there are the main comments:

- The manuscript requires significant editing by a professional English language editing service. The topic appears to have potential interest; however, the current condition of the manuscript raises concerns regarding the quality of expression, clarity, and adequacy of explanations.
- Authors should have provided the latest research gap in the introduction section
- Provide reference in the first sentence of the second paragraph
- Authors need to write a paragraph on the contributions of this paper in the introduction section
- Authors should have described the support of the theory to strengthen their arguments
- Authors should write a paragraph with the latest references on the antecedents and consequences of Entrepreneurship and then connect it with the present situation of Morocco.
- Authors should write about the advantages of Entrepreneurship from economic and social perspectives with the latest references.
- The paper's theoretical and practical contribution needs to be more comprehensive. The paper should be revised to more accurately reflect its contribution to the field.
- Authors need to justify the sample size selection
- I also have concerns about the possible bias present in the data.
- Please explain how the non-response bias test was performed if any.
- Write practical implications with strong arguments
- Furthermore, the practical implications section would benefit from more detail and rigor. It requires greater clarity, creative insights, bridging the gap between theory and practice, and the inclusion of real-world examples. These additions will enhance the practical relevance and applicability of the findings.
- Write a separate paragraph on the conclusion of the research

- Provide future research directions in detail.
- Please, pay particular attention to typos, unfinished and complex sentences.
