

Review of: "Toxicological evaluation of aqueous extracts of *Clematis hirsuta* and *Rhamnus prinoides*"

Ahmed R. Sidhu

Potential competing interests: No potential competing interests to declare.

Comments to the author

The article needs some revision to be suitable for publication:

Authors need to highlight novelty in this article if there is any.

Abstract: As stated in the Introduction, the abstract should be more focused on the leaves and roots of *Clematis hirsuta* and *Rhamnus prinoides*.

The species and genus name should be written italic.

Authors should provide clear information on when the haematological and biochemical examinations were carried out.

Check the results of the statistical analysis.

Need to correlate the activities to the previously reported study.
