Potential competing interests: No potential competing interests to declare.

This is a good paper; see below some comments to improve the paper.

1. The paper needs to follow the general structure of a manuscript.
2. No numbering of the aims and objectives.
3. Use the triangle structure in the introduction. Start with the main problem and narrow down into the main focus. Three paragraphs are enough. Avoid the use of one or two sentences as a paragraph. Check the case of **Colony Morphology** in the methods section.
4. A map of the study is useful.
5. The methods section needs to be consolidated to have a clear flow.
