Comments to the authors

1. Title and abstract: sound with minor revision

Did you study the impact of exchange rate and interest rate on stock prices? Why recommendation on interest rate is not mentioned in the abstract?

1. Introduction/background: sound with minor revision

Suggestions: the authors should mention the relationship between interest rate and exchange rate, and the difference in their impact on stock prices. Monetary policy is not an internal factor as presented, and it impacts the money supply and interest rates and the change in the relative value of currency. The author(s) should justify the rational of the study.

1. Literature review: sound with minor revision

Lack of research hypotheses. They should be added.

1. Methodology: sound

2. Others

- a. The findings' discussion should follow the findings and should be presented in the same section.
- b. All findings should be discussed, and the discussion of research findings should be related to theory and results of previous studies.
- c. Provide a discussion on the limitations of the study.

It is expected that the authors will consider seriously these comments to improve the paper's quality.
