Dear Respected Authors

I am glad when I read your work. The way of symbol representation is similar to Reed Solomon Codes with alpha representations. You must notice a number of notes:

1. Your work needs a detailed Abstract, while yours is only 3 lines (about 30 words)!
2. You use a small number of references; in addition, 65% of them are considered old (not from the last ten years).

Congratulations on your work, and best regards...
