DNA RNA and Peptide Synthesis Shared Resource

National Cancer Institute

Source

National Cancer Institute. *DNA RNA and Peptide Synthesis Shared Resource*. NCI Thesaurus. Code C39378.

DNA, RNA and Peptide Synthesis Laboratories provide support to researchers regarding oligonucleotide and peptide chemistry. Primary services of this facility include: synthesis of DNA, RNA, chimeric DNA/RNA molecules, and custom oligonucleotides, including those containing modified bases, modified sugars, and incorporated labels and linkers, and synthesis of various types of peptides.
