

Review of: "Perceptions and Attitudes about COVID-19 Vaccines Regarding Vaccine Intention and Hesitancy of Attendants of a Healthcare Center in Northern Cyprus"

Halimat Adededeji-Adenola

Potential competing interests: No potential competing interests to declare.

Find below some areas that need adjustments.

Abstract: Kindly remove the number of respondents under the method and include them under the result. There is a typographical error on the second line of the result. " more than one dose"

Method: The method did not state the sample size determination and sampling technique used.

The objective and conclusion did not tally. The conclusion appears like a discussion. The conclusion should concisely agree with the stated objectives.

This manuscript needs a major revision.
