Potential competing interests: No potential competing interests to declare.

The manuscript "The Effectiveness of Prison Education in Reducing Criminal Recidivism: A Systematic Review" addresses a topic that is both interesting and sensitive.

Comments and suggestions:

- The manuscript should be read once more for spelling mistakes, repeated words/parts of the sentence, but also to provide a consistent style for citation within the text.
- The studies found (10 or 11, to be exact?) by the author are not too many; I think that the author should observe the articles published in a larger period of time, not just the last 5 years.
- The author mentioned a short summary of the articles used in his review, but it was not clear to me the connection of the respective research results with the initial question of the author's systematic review.

Thank you!

Good luck in your future research!
