Nodule-Inducing Virus

National Cancer Institute

Source

National Cancer Institute. *Nodule-Inducing Virus*. NCI Thesaurus. Code C29902.

An exogenous, infectious mouse mammary tumor virus isolated from BALB/cNIV/Crgl mice, thought to be derived from the endogenous low oncogenic mouse mammary tumor virus found in C3Hf mice. (from Cancer Res. 1984 Oct;44(10):4333-6)
