Potential competing interests: No potential competing interests to declare.

Abstract Length: The abstract is relatively lengthy and could be condensed to highlight key findings and objectives more succinctly.

Figure Clarity: Revise Figures 6 and 8 to ensure clarity in terms of axes and variables being represented. This will enhance the visual understanding of the results.

In conclusion, the paper addresses an important environmental and infrastructure challenge, offering valuable insights into the use of plastic waste for pavement construction. With minor revisions, the paper has the potential to make a significant contribution to the field of sustainable construction materials.
