Potential competing interests: No potential competing interests to declare.

1. The proposed GAN-LSTM method is not clearly described, the GAN method is an unsupervised learning, but it does not reflect unsupervised learning in the section 3, please describe the section 3 more specifically.
2. The explanation of the feedback mechanism is not clear enough, please explain the reasonableness of the feedback mechanism in detail.
3. please describe the innovation of the proposed GAN method in detail.
4. The symbol representation in the description is not clear enough, please clearly define all the symbol representations in the section 3 description.
5. Figure 1 is not explained, please provide relevant experimental explanations.
6. The format of the references of the paper needs to be modified, and the English description of the entire paper needs to be polish.
