Comments:

I have performed a detailed review of the paper, and suggestions are made.

General comments

- Papers introduction has a good thesis/study statement
- Author/s clearly stated the purpose of the study and well explained using supporting literature
- Background information to support the purpose of the study is well explained
- Paper is interesting and contains useful contribution to the extant literature and I must say the paper demonstrate an adequate understanding of the relevant literature
- The paper is thoroughly analysed, clearly established and well presented
- Finally, conclusions tie together the elements of the paper
- Author is recommended to mention 1-2 additional limitations of the study
