Salivary Gland Basal Cell Adenoma

National Cancer Institute

Source

National Cancer Institute. *Salivary Gland Basal Cell Adenoma*. NCI Thesaurus. Code C5950.

A benign epithelial neoplasm with a uniform, monomorphic appearance that is dominated by basal cells forming trabecular structures. It is rare, and occurs mostly on the parotid gland. The average age of patients has been reported to be 58 years. Swelling is the most constant clinical finding.
