

Review of: "Assessing International Tourist Satisfaction in Phu Quoc: Recommendations for Sustainable Ecological Economic Development"

Naimatullah Shah¹

¹ University of Sindh, Pakistan

Potential competing interests: No potential competing interests to declare.

1. The introduction of the paper is not clear and very short. It should be updated and increased.
2. Literature Review: It is also very weak. Need to provide the latest research literature and research gap.
3. Conceptual framework: Couldn't find conceptualization and research hypotheses.
4. Methodology: Need to add measurement scales, selection of data sample, data collection procedure, and data analysis techniques.
5. Data analysis: Used poor data analysis techniques.
6. Conclusion: It needs more attention to be robust.
7. Overall: The research paper is not accepted for publication in this position. However, there is room for improvement.
