Dear Editor and Authors,

The topic is really important. Thank you for giving me the chance to review this work. Please see my comments below:

- A cross-sectional study is a kind of quantitative observational study whereas your research is a qualitative study. So please delete cross-sectional study when describing the type of your research.
- Please specify the aim of the study in the abstract section.
- Clarify how you selected the participants, e.g. purposive, convenience.
- If you conducted face-to-face interactions with the participants, please mention it in both the method section and abstract.
- Clarify how many people refused to participate. What were their reasons?
- Where was the interviews conducted?
- Who conducted the interviews? Was the researcher male or female? What were the interviewers' credentials?
- What measures did you take to ensure the rigor of the study?
- Please acknowledge the limitations of the study.
- The manuscript is too long and needs to be summarized.
