

# Review of: "Academic Integrity in Poland: A Culturally Sensitive Code of Ethics Proposal"

Hasnah Haron

**Potential competing interests:** No potential competing interests to declare.

An interesting paper but it can be improved by organising into various sections for readers to follow better. Suggest the following sections:

1. Introduction
2. Problem Statement- How rampant is cheating in Polish Universities- Has it increase over the years? ( include the source)
3. Objectives- (1) to examine the current state of cheating by university students in Poland, (2) Factors that have caused cheating (3) recommendations to overcome cheating
4. Literature Review- can also include "Government Initiatives to decrease cheating"- legal reforms, having code of ethics; penalties; conduct of examination and "Factors that led to cheating" - technology, lack of awareness, pressure to perform, lack of enforcement not to cheat, lack of awareness that the act conducted is cheating
5. Discussion and Recommendation- Summary of paper and answer the research objectives

The title can be change so that it is line with the contents of the paper. For example "Factors that Influence Poland students to cheat"

All the best in the paper.
