

Review of: "A Novel One-Pot Three-Component Approach to Orthoaminocarbonitrile Tetrahydronaphthalenes Using Triethylamine (Et₃N) as a Highly Efficient and Homogeneous Catalyst Under Mild Conditions and Investigating Its Anti-cancer Properties Through Molecular Docking Studies and Calculations"

Maryam Ariannezhad

Potential competing interests: No potential competing interests to declare.

- Authors should prepare new organic compounds and present full characterization data, including IR,¹³C NMR, and MS, which are missing in the supporting information.
- Improve the conclusion.
- Few grammatical structures should be sorted out to improve the quality, page 3.
