

Review of: "Assessment of Microbiological Quality, Phytochemicals, Trace Elements and Proximate Analysis of Bio-Clean II Herbal Remedy"

Eslam Elsherbiny

Potential competing interests: The author(s) declared that no potential competing interests exist.

The present manuscript is deal with the microbiological quality, phytochemicals, trace elements and proximate analysis of Bio-Clean II, some comments should be considered.

1- Bio-Clean II should be defined and its gradients should be mention in **METHODOLOGY** section.

2- Author examine the presence of microbial contaminants but its important to evaluate its antimicrobial activity.

3- as mentioned in **DISCUSSION** section Bio-Clean II has anti viral activity to HIV and Herpes, its recommended to examine this property in *vitro*.

4- Many studies should be cited as:

Ziziphus spina-christi (L.) fortified with Camellia sinensis mediates apoptosis, Notch-1 signaling, and mitigates obesity-induced non-alcoholic fatty liver
