Ebstein malformation

INSERM

Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base*. [Ebstein malformation](#). ORPHA:1880

Ebstein's malformation is a rare congenital cardiac anomaly characterized by rotational displacement of the septal and inferior leaflets of the tricuspid valve such that they are hinged within the right ventricle, rather than as expected at the atrioventricular junction.
