

# Review of: "Redefining borders in the contested territory between San Pedro and San Andres Cholula"

Gonzalo Pérez Álvarez

**Potential competing interests:** No potential competing interests to declare.

It is a solid article, which articulates in a clear and relevant way the analysis of the territory addressed with the social and economic changes that took place there, observing the capitalist restructuring process experienced by those communities.

The article manages, in the framework that develops aspects that are traditionally addressed separately or fragmentarily, to demonstrate the historicity of the region in articulation with territorial dynamics. It would be interesting if a broader bibliography could be integrated into the Latin American perspective, which would allow other debates to be addressed from the same case study.

Se trata de un artículo sólido, que articula de manera clara y pertinente el análisis del territorio abordado con los cambios sociales y económicos allí acontecidos, observando el proceso reestructuración capitalista vivenciado por esas comunidades.

El artículo consigue, en el entramado que desarrolla de aspectos que tradicionalmente se abordan de manera separada o fragmentaria, demostrar la historicidad de la región en articulación con la dinámica territorial. Sería interesante que se pudiera integrar una bibliografía más amplia en la perspectiva latinoamericana, que permitiría abordar otros debates a partir del mismo caso de estudio.
