Dear authors,

Your research note is interesting.

I have some suggestions.

1. Based on your article, I think it will be better if the title is "Dengue - Prevention and Therapeutic Efforts in Mexico". However, if you want to focus on the therapeutic efforts, then I suggest that you omit the explanation related to the prevention efforts.
2. For the prevention efforts, I think you should look at the public health prevention efforts for dengue. Is there a community program to minimize Aedes' breeding sites? Please read <https://www.frontiersin.org/articles/10.3389/fitt.2021.814205/full> and <https://bmcpublichealth.biomedcentral.com/articles/10.1186/s12889-017-4293-9>
