Potential competing interests: No potential competing interests to declare.

This is an excellent paper. It is well-written and properly argued.

However, the author should explain the relevance of Figure 1 to this paper.

Instead of Figure 1, the author should construct a conceptual framework that should guide the study.

The mode of referencing is not clear; it is unclear whether footnotes are being used or other types are.

Those are my comments; otherwise, the paper is good.
