

Review of: "Design of an intelligent controller for improving the solar system efficiency"

Daniel Anitha

Potential competing interests: No potential competing interests to declare.

The article includes number of MPPT techniques as discussed in section II -MPPT Control Overview. The reason for choosing only two out of the other methods needs justification with proper referencing.

Discuss how the fuzzy sets and the rules are framed.

There are spelling and grammatical errors. Eg. Title of Figure 8. The manuscript must be read thoroughly.
