Potential competing interests: No potential competing interests to declare.

Research work is useful in the commercial domain. Few points must be noted by the author:

1. However, the author must elaborate on the methodology part and add an architecture to present the workflow!!

This architecture must show the phases in which the work has been done. The author must show the algorithm and its working with the dataset.

2) Also discuss the dataset in detail.

3) Add 4-5 latest research papers to the references.

After adding these updates, the paper is acceptable.
