Potential competing interests: No potential competing interests to declare.

Introduction mostly consists of the material of the UN agenda. No background of the Nigerian economy, especially the social issues, is discussed.

Methodology part is very short.

Section 3 is well written, but my concern is that actual implementations are not discussed. What has the Nigerian government set targets for under each goal? What will be the strategy? Any fixed budget announced by the Nigerian government against each goal?

Sections 4 and 5 can be merged. But there is very unnecessary explanation. Shorten the length.

Conclusion part is small according to the provided situations and implementations.

Need Minor Revisions
