

Review of: "Conceptual oxymoron, oxymetaphor, and oxymetaphonymy: inclusive border and violent inclusion in close-up"

Nazan Yildiz

Potential competing interests: No potential competing interests to declare.

The study is so captivating in that it redefines the concepts of border and inclusion via examining violent inclusion and inclusive border on linguistic grounds by classifying them as conceptual indirect oxymora. Taking the significance of the concepts “violent inclusion” and “inclusive border” into account on today’s socio and geopolitical agenda; the study is a fascinating exemplar of the relationship between linguistics and worldly concerns, and undoubtedly contributes to linguistic studies.
