

# Review of: "The Global Impact on Health of Dental Infections and Antibiotic Resistance:A mini Reveiw"

Nahyan Almansoori<sup>1</sup>

<sup>1</sup> Colleges of Medicine of South Africa

**Potential competing interests:** No potential competing interests to declare.

- Title needed to be reviewed; it should always include Population, Intervention, Comparison, and Outcomes.
- Abstract needed to be restructured and shortened.
- Introduction: All facts needed to be cited.
- Methodology: not mentioned.
- Results: Statistical analysis not mentioned.
- Discussion or conclusion: needs to discuss the issue and reach solid conclusions.
- The article is not well structured.
- A study protocol will give you more insight into how to structure a comprehensive article review and reach a conclusive outcome. For every type of study, there is a certain methodology that you should follow, which gives you a system for combining your thoughts and proving your main argument.
- Nevertheless, well done and good luck in your future work.
