

# Review of: "Longevity of Electric Vehicle Operations"

A. N. Archana

Potential competing interests: No potential competing interests to declare.

The article covers the review of EVs that affects its longevity. I could not relate the title with the contents of the article. Also the article does not cover any case studies or validations related to the facts discussed. The factors affecting the longevity of EVs is well known from the existing literatures. It would be good if the article validates the impacts with real-time studies or results.
