## Colchicine-Site Binding Agent ABT-751

National Cancer Institute

## Source

*National Cancer Institute. <u>Colchicine-Site Binding Agent ABT-751</u>. NCI Thesaurus. Code C2679.* 

An orally bioavailable antimitotic sulfonamide. ABT- 751 binds to the colchicine-binding site on beta-tubulin and inhibits the polymerization of microtubules, thereby preventing tumor cell replication. This agent also disrupts tumor neovascularization, reducing tumor blood flow and so inducing a cytotoxic effect. (NCI04)
