Potential competing interests: No potential competing interests to declare.

I extend my heartfelt congratulations to your team for the successful execution of your mission and the invaluable assistance provided to patients with cleft lip and palate conditions. I also commend you for the overall quality of your manuscript.

Abstract:

The abstract effectively summarizes the study design, type, and details of the cleft lip and palate patients treated. Please use keywords listed in ICD-10 classification

Introduction:

Your introduction stands out for its clear articulation of the background, rationale, and objectives of the study.

Materials and Methods:

Your initial reference to the country as "Y," followed by its identification as Togo, gives out the identity.

What was the reason behind identifying the patients as favourable socio-economic conditions and unfavourable socio-economic conditions. Did the mission provide monetary assistance and take care of needs of unfavourable socio-economic conditions only ?

When assessing results as "Good" and "Poor," it may be beneficial to adopt a more objective evaluation method for greater precision.

Results, Discussion, and Conclusion:

The sections dedicated to results, discussion, and the conclusion have been skillfully crafted and provide a robust foundation for the study's findings and implications.
