Dear Sir, Thank you very much for the trust you have placed in us. I would like to address some important points:

1. The results and discussion need further clarification.
2. The presentation of results has been limited to stating whether values increased or decreased, with accompanying graphs.
3. The references require updating, focusing on sources from the last five years.
4. The introduction is too long; please shorten it.
5. The language needs to be rephrased.
6. Some of the forms for the materials used in the reactions are unnecessary.

Wishing you continued success.

Best regards,

Prof. Dr. Ammar Ahmed Hamdoon
