Potential competing interests: No potential competing interests to declare.

The researcher provide the emerging and current topic. However, there is some correction need to be address to improve the content of the manuscript.

The comment as per listed below:

1. Rather than researcher explaining other theory in literature review, it is suggested for the researcher to focus on development of hypotheses on the literature review. The researcher need to focus on all the variables and hypotheses created.
2. The researcher need to include the draw of conceptual framework.
3. As researcher using PLS SEM, they need explain it comprehensively based on measurement and structural model.
4. The researcher need to enrich their limitation and conclusion part.
