Potential competing interests: No potential competing interests to declare.

The article needs some improvements, especially in the formatting part, for example, spacing (page 7) and subscripts in chemical formulas (page 7, 10, etc.).

In equation 3, the abbreviation for grams is g.

Were the compositions in tables 2 - 5 prepared in replicates?

Were the flame photometer measurements performed in replicates? It would be important to include variations in the measurements.
