Potential competing interests: No potential competing interests to declare.

The manuscript endeavoured to comparatively analyse the energy policies of both Nigeria and the UK.

While this is almost incomparable on so many grounds, the article has not been able to sufficiently argue the Nigerian energy policy as there are so many points not captured as it relates to;

1. The generation parameters in Nigeria (Gencos and the likes)
2. The distribution and holding companies and their peculiarities
3. The NERC which serves as the regulator in that field/sector.
4. Also, smart metering, small grids etc are some of the innovations that have not really taken the center stage in the Nigerian Energy policy sector
