

# Review of: "Prevalence of Buruli Ulcer Among Residents in Jasikan Municipality: A Cross-Sectional Study"

Selvaraj Stephen

Potential competing interests: No potential competing interests to declare.

This is a good work.

1. The authors may add a few photographs of the Buruli ulcer patients.
2. Out of 32 samples sent for PCR, positive results are available for 13 patients and the results for 19 samples is "pending". This must be included as a limitation of the study.
