Comments

It was a good paper that was well written, and I would like to appreciate the effort of the authors in assessing the status of the stocks of economically important species. There are a few things that need your attention.

I attached the PDF file of the paper with some comments also.

Citations should be in a uniform format (all letters in upper case or only the first letter in upper case).

1. Introduction

A recent study by Silva Júnior et al. (2017) ~~in Amazon~~ estimated fish stocks in the Amazon using an.....

I think you should provide some justification for how good the results of the model are as you violate some assumptions....

2.1. Study area and data collection

We gathered the data used in this study from May 2018 to April 2019 by daily monitoring.....

Changed to "The data was collected from May 2018 to April 2019 by daily...."

It is better to add a few lines regarding the commercial importance of the selected species (price, preference...)

3. Results

.....presented in Figure 1.

Please provide units for the Effort and the CPUE in figures

4. Discussion

As Lorenzen et al. (2016) pointed out, the tendency lines can hold critical information about the ~~exploration~~ exploitation levels of each.....

....inexpressive (DORIA & LIMA, 2008; DORIA et al., 2012; DORIA, LIMA & ANGELINI, 2018)—opening space for the discussions around the under-exploration exploitation of the region, and what factors are influencing it.
