Potential competing interests: No potential competing interests to declare.

The author must sort out the expression that has the reference: Anggaira (2023). It is not clear whether 'Said' is the verb in its past tense form or is the proper noun. For the sake of consistency, the author must use title case for authors' last names and not the upper case. The author must clarify the criteria used in selecting the literature for the study. It is noted that all literature used is exclusively published in 2023. However, some literature entries are not correct; for instance, Weston et al's appears as 0(0) while the actual article should be 74(4). It is not clear whether the author has actually engaged with the cited literature. There does not seem to be any appraising of literature through the indicated theoretical frameworks. The manuscript will therefore benefit from a major revision.
