# Domeboro Solution

National Cancer Institute

## Source

National Cancer Institute. *Domeboro Solution*. NCI Thesaurus. Code C29001.

A aluminum solution with astringent, antibacterial, and antifungal properties. Domeboro solution is a commercial preparation of modified Burow's solution, (5% aluminum acetate) by Bayer. Aluminum sulfate, the active ingredient of Domeboro, is attributed for this agent's bacteriostatic effect. Domeboro is used most often to cleanse irritated skin and soothe inflammation.
